

Baldwin

SUPPLY COMPANY

DEPENDABLE SERVICE.
INNOVATIVE SOLUTIONS.

The leading distributor of mechanical power transmission, conveyor belt, electric motor, and control products in the Upper Midwest.

OUR STORY

→ For three generations, Baldwin Supply has operated under the principle that the secret to success is helping our customers succeed.

It's been more than 100 years since Baldwin Supply started out in a one-room storefront in 1920—serving the needs of the flour mills of Minneapolis. Today, we offer a wide array of products and services to a diverse set of industries. We've come to understand that digging deeper and going the extra mile to solve problems for our customers is more than a matter of "value-added." It's a matter of staying true to the values that have led to our success as a company.

Baldwin Supply isn't just here to reinvent the wheel—or the conveyor belt. We just want to continue to do what we do best: provide our first-class services to our customers, so that they can flourish in doing what they do best.
