

SIRIUS ACT

Commanding and signaling devices

Powerful machines need powerful controls. SIRIUS ACT offers a unique portfolio of small-sized top performers which can deal with big issues. Pushing a button is everything else but just pushing a button.

SIEMENS

SIRIUS ACT Commanding and signaling devices

From simple push buttons to the indicator lights to pre-assembled enclosures with a multitude of connectivities.

Come to the world of SIRIUS ACT – Performance in Action

The choice is yours:

Single devices

You order the actuator, the holder and the LED/contact module as separate items.

> The freedom to combine products ensures maximum flexibility, as you can stock them individually as required.

Complete units

You quote just one article number to order all three of the elements needed to create a functional unit.

> This helps you to save time, effort as well as money when ordering products for common applications.

Compact units

You quote just one article number to order a functional unit consisting of actuator with integrated electronics and holder.

> Easy handling thanks to an all-inclusive solution.

Customer-specific configurations

Mounted casings, labels, special lockings and a lot more can all be individually selected – image-based and with complete documentation. For ease of identification when posing follow-up orders a customer identification number (CIN) is used.

Three modern design lines

in high-grade plastic and metal will win you over with their positive surface feel and brilliant illumination. For the design specification of your facility you can choose from the following:

- **Plastic, black**, 22 mm Ø
- **Metal, shiny**, 22 mm Ø
- **Metal, matte**, flat, 30 mm Ø

Easy to install

- Fast single-handed installation thanks to self-retaining actuator
- Indication for safely mounting components by aligning arrows
- No special tools required
- Innovative snap-on concept with definite module slots; modules can be cascaded
- Simple, self-explaining fixation of holder on plates up to 6 mm thickness

Innovative snap-on concept

All components snap on without the need for tools – even in a slanting position; integrated lever for release

Stacking contact blocks

Up to 3 modules can be plugged together side-by-side, each with 2 contact blocks plugged onto one another

100% twist prevention

Twist-proof holding by screw fixation

Groove-free milled hole

Easy insertion of components without aligning anti-twist lugs

Visual mounting indicator

Align the arrows to correctly mount the components

Simple installation

Fast fixation on the plate with a screwdriver (no special tools needed)

Easy-to-see module slots

Fault-free connection of modules even when contact blocks are stacked

Easy removal

Simply press the release lever to remove the holder

Robustness – Uncompromisingly industry-compatible

- Rugged and durable even in a tough environment
- Very high resistance to water, dust and temperatures thanks to degree of protection IP69K (incl. IP66, IP67, IP69) throughout
- High resistance against media like oils, aggressive vapors, and brines
- Suitable for the food and beverage industry

Flexible communication – for reduced wiring and extended diagnostic and parameterization possibilities thanks to TIA portal

Various connectivity options:

- Standard wiring (push-in, solder, screw connection)
- AS-Interface
- IO-Link
- PROFINET/PROFIsafe

SIRIUS ACT with PROFINET

The digital solution for communication in the field and the control panel

SIRIUS ACT standard units become communication-capable devices by snapping communication-capable terminal modules onto the standard holder and using them together with a standard or safety interface module. Installation is easy, no special tools are required, just a screwdriver.

The system:

- > Always 1 interface module (IM) to connect to the controller
- > Up to 20 terminal modules (TM) can be used per interface module (IM)
- > Distance between the terminal modules ≤ 1 m
- > Gesamtlänge des Systems ≤ 10 m

Further information on flexible communication interfacing:

ID key-operated switches

Reliable identification of groups or individuals for greater plant security

The SIRIUS ACT ID key-operated switch is designed to ensure that only authorized persons can carry out work on plant and machinery. A factory-encoded authorization is embedded in every colored key.

More information about the different variants and highlights: [siemens.com/sirius-act/id-key](https://www.siemens.com/sirius-act/id-key)

The information provided in this brochure contains merely general descriptions or characteristics of performance which in case of actual use do not always apply as described or which may change as a result of further development of the products. An obligation to provide the respective characteristics shall only exist if expressly agreed in the terms of contract.

All product designations may be trademarks or product names of Siemens AG or other companies whose use by third parties for their own purposes could violate the rights of the owners.

Siemens provides automation and drive products with industrial security functions that support the secure operation of plants or machines. They are an important component in a holistic industrial security concept. With this in mind, our products undergo continuous development. Consequently, we recommend that you regularly inform yourself of any updates to our products and use only the current versions. You can find further information at:

<http://support.automation.siemens.com>

You can also register at this website to receive a product-specific newsletter.

To ensure the secure operation of a plant or machine, it is also necessary to take suitable preventive action (e.g. cell protection concept) and to integrate the automation and drive components into a state-of-the-art holistic industrial security concept for the entire plant or machine. Third-party products that may be in use should also be considered.
